Charles Sturt University

2011 CHART OF ACCOUNTS

The Banner Finance System has a Chart of Accounts dissection as follows:

COAS CHART number	-	1 character, currently = "5"
F FUND Code	-	4 characters, 5 level hierarchy
O ORGANISATION Code	-	3, 4 characters, 6 level hierarchy
A ACCOUNT Code	-	3,4 characters, 3 level hierarchy
P PROGRAM Code	-	4,5 characters, 4 level hierarchy

An example of a Charles Sturt University FOAP cost centre is:

Fund	Orgn	Acct	Prog
A102	- 245	- 360	- 0000

The System generally refers to the code structure as a FOAP definition, which is taken from the first character of each code. Coding of all income and expenditure transactions must include the appropriate Fund, Organisation, Account and Program codes. The Activity and Location code values are defaulted in by the Finance System at the time of processing.

The purpose of the FUND Code is to identify the source of funds, particularly where there is a need to provide separate financial statements for the funding involved. It can also be used where separate costing is required, but where there is no unique Organisation Code, for external fund sources.

The purpose of the ORGANISATION Code is to identify a unique subset of the University's organisational structure for operational purposes. It will closely follow the official Organisation Chart at the higher levels, but at the lowest level it will be determined by Primary and Secondary Budget Centre Managers to suit their individual needs for budgetary control. Generally, the Organisation Code will relate to a unit which has staffing and/or physical facilities attached.

The purpose of the ACCOUNT Code is to classify each transaction by the type of income or expenditure it is, for financial reporting and management control purposes.

The purpose of the PROGRAM Code is to provide for programs/projects that occur across various Fund, Organisation and Account codes. For example, it may identify a consultancy project within an Organisation code, or a particular event such as Graduation.

Transactions can only be processed on codes which are "Data Enterable"
(refer RHS column).

Charles Sturt University

2011 CHART OF ACCOUNTS

FUND TYPES & FUND CODES

Fund Type Hierarchy (Finance Use Only):

<i>Level 1</i>	Major Fund Source
<i>Level 2</i>	Fund Source Categories

Fund Code Hierarchy:

<i>Level 1</i>	Fund Source Categories
<i>Level 2</i>	Fund Source Sub-categories
<i>Level 3</i>	Fund Source Groups
<i>Level 4</i>	Fund Source Items
<i>Level 5</i>	Fund Source Sub-items

The Fund Type is a two (2) character numeric code and the Fund Code is a four (4) character alphanumeric code. Fund Type is used by the system for reporting purposes.

The code is Xnnn, where X = an alpha character denoting the type of fund (A - Operating, E - Enterprise, R - Research, S - Special Purpose, T - Trust, X - Sinking) and nnn is a meaningless number allocated to identify the code.

All transactions in lower levels are sub-totalled up to the higher levels of the hierarchy for reporting purposes. Transactions may only be entered at a level which allows data entry (usually the lowest level). Codes which may not be used for transactions are indicated by "N" in the right-hand column - they may only be used for inquiries/reporting.

2011 CHART OF ACCOUNTS - ORGANISATION CODES

Last update:

16-Dec-11

Organisation Code Hierarchy:

<i>Level 1</i>	Organisational Level
<i>Level 2</i>	Primary Budget Centres
<i>Level 3</i>	Secondary Budget Centres
<i>Level 4</i>	Tertiary Budget Centres
<i>Level 5</i>	Tertiary Unit Budget Centres
<i>Level 6</i>	Tertiary Sub-Unit Budget Centres

The Organisation Codes equate to the more common terminology of Cost Centres, but these codes must only be for Organisational units, ie a subset of the formal Organisational Chart of CSU.

If the component is not a "functional" unit that has either staffing and/or physical facilities attached to it, an Organisation code is not appropriate.

All transactions in lower levels are sub-totalled up to the higher levels of the hierarchy for reporting purposes. Transactions may only be entered on codes which allow data entry - those not used for transactions are indicated by "N" in the right-hand column.

2011 CHART OF ACCOUNTS - ACCOUNT TYPES & ACCOUNT CODES

Last update: 25-Oct-11

Account Type Hierarchy:

Level 1 Account Type Category

Level 2 Account Type Code

Account Code Hierarchy:

Level 1 Account Category Code

Level 2 Account Item Code

Level 3 Account Sub-Item Code

Transactions may only be processed on a code that allows data entry. Data-enterability is indicated in the right-hand column. Codes which may not be used for data entry (ie only used for Inquiry/Reporting purposes) are indicated with 'N'. Codes which may only be used for budget entries (not for Year to Date entries) are indicated with 'B'.

There is a 2-digit Level 1 Account Code for each income and expenditure category. These Level 1 codes are the level at which budget is normally recorded on the system.

In some categories there are Level 3 codes as well as Level 2 codes. The Level 2 Account Code is preferred for the coding of transactions, to reduce the size of reports and simplify the monitoring of financial results. Level 3 codes may be used if the further detail is required for budget management or reporting purposes.

Transactions in level 2 and 3 Account Codes are sub-totalled up to the level 1 Account of the category, for available balance calculation and reporting purposes.

Conventions for using Account Codes are explained in "Income/Expenditure Coding Guidelines" at:

http://www.csu.edu.au/division/finserv/staff/policies/p_reference_docs.htm

2011 CHART OF ACCOUNTS - PROGRAM CODES

Last update: 16-Dec-11

Program Code Hierarchy:

<i>Level 1</i>	Program Categories
<i>Level 2</i>	Program Items
<i>Level 3</i>	Program Sub-Items

The Program Code is a four digit numeric code allocated for each program without trying to build a meaning into the code.

While the system allows for a 5 level hierarchy, only 3 will generally be used.

All transactions in lower levels are sub-totalled up to the higher levels of the hierarchy for reporting purposes. Transactions can only be entered at a level which allows for data entry (usually the lowest level). Codes which may not be used for transactions are indicated by "N" in the right-hand column - they may only be used for inquiries/reporting.

(This page is intentionally left blank.)
